I purchased a new giant AR card from club Nintendo, but when I ordered it, it said I used 350 coins instead of 200, as the site said the price was. Why is this happening?

Idk, but call nintendo about it.

That's odd. It looks like there was a glitch in the reward purchase. Even though the transaction says that you paid 350 coins, it would be a good idea to check the balance of your coins after the AR card purchase, just to be sure if Nintendo really did charge you extra. If your current balance has subtracted 350, and not 200, then it would be best to give Nintendo a call (at 1-800-255-3700, open 6AM to 7PM Pacific time), and they'll fix the problem😊.
